

1  
2 Recommendation  
3

4 Few people question the need of the Simonian Little League for new ballfields and both the  
5 Assembly and Mayor are committed to using public resources for that purpose. Use of available,  
6 existing Municipal property or private property that can be traded for Municipal lands of equal value  
7 eliminates the need for an expensive bond proposition and preserves the tax base. Moreover,  
8 allowing the Mayor and his project management staff to prepare a final construction plan which  
9 includes substantial private sector contributions from the Simonian Little League and other entities,  
10 will most likely achieve a cost-effective result. Most importantly, however, implementation of the  
11 resolution will allow for continued, uninterrupted play in the Simonian Little League by the Summer  
12 of 2004.  
13

14 Approval of AR 2002-51 is recommended.
